

## ENERGY SUPPLEMENTS

### **VOERMOL MOLASSES MEAL**

Class: Energy Supplement

**VOERMOL MOLASSES MEAL** contains molasses syrup and is a good source of energy:

- improves the palatability, texture and appearance of any feed or lick;
- reduces dustiness and separation of feed and licks;
- at an inclusion of between 5 % and 10 % to feeds it will act as a good binder during the pelleting process;
- stimulates the appetite of sick animals due to the high content of B Vitamins and trace minerals;
- is a versatile product with many practical applications and can be used as a partial substitute for grains;
- can be used in rations/licks for dairy cattle, feedlot cattle, sheep, goats and ostriches as well as in cattle and ruminant game licks.

#### **COMPOSITION OF VOERMOL MOLASSES MEAL**

REG NO V1995 (Act 36/1947) N-FF 0079

(g/kg)

Crude Protein	(min)	40
Crude Fibre	(max)	100
Moisture	(max)	160
Fat	(min)	8
Calcium	(max)	8
Phosphorus	(min)	1
Energy (MJ ME/kg)		10.5

Packaging – 40 kg

#### **ADDITIONAL USES**

##### **BEEF CATTLE FEEDLOT RATIONS**

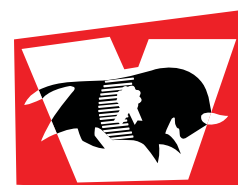

Replace grains kilogram for kilogram with **Voermol Molasses Meal** up to a maximum daily intake of 1.2 kg. In feedlot rations **Voermol Molasses Meal** can replace up to 12 % of the grain.

##### **CATTLE LICKS**

Up to 50 % of the grains in a production and up to 100 % in a maintenance lick can be replaced with **Voermol Molasses Meal**. **Voermol Molasses Meal** can be used for the mixing of feeds and supplements for ruminant game.

##### **DAIRY RATIONS**

**Voermol Molasses Meal** can be included (between 8 – 12 %) in a dairy ration to replace grains.

**VOERMOL**

---

## **SHEEP LICKS AND RATIONS**

Approximately 25 – 40 % of the grains in a production lick and 100 % in a maintenance lick can be replaced with **Voermol Molasses Meal**. **Voermol Molasses Meal** at an inclusion rate of 8 – 12 % can be included in a sheep fattening ration to replace grain.

## **SILAGE**

**Voermol Molasses Meal** can be used as an energy source in order to preserve silage.

## **RECOMMENDED INTAKE FOR SILAGE**

Grass silage/small grain silage: 20 – 40 kg/ton wet silage

Legume silage: 40 – 80 kg/ton wet silage
